PERMIT NUMBER: ACT/007/012

DATE OF INSPECTION: 10/28/99

(Comments are Numbered to Correspond with Topics Listed Above)

2. SIGNS AND MARKERS -

The identification signs were inspected and were found to be complete and accurate. The phone number needs to be more visible due to fading.

The topsoil signs were located on the topsoil piles as required.

4A. DIVERSIONS -

The diversions were spot-checked throughout the property and would function properly in an event.

4B. SEDIMENT PONDS -

Sediment ponds were inspected and no hazardous conditions were noticed. None of the sediment ponds were discharging during the inspection.

4C. OTHER SEDIMENT CONTROL AREAS -

Several alternate sediment control areas were inspected and were found to comply with the R645 Coal Rules. Silt fences have recently been repaired.

8. NON-COAL WASTE -

Several 55-gallon drums are located near the undisturbed area by the course refuse pile; these drums need to be stored near the sediment pond. The containers were full of petroleum liquid. If ruptured, the fluid would flow into the pond; where it should flow. Permittee has committed to move these containers.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
